

MIC 2000™

Versatile with High-End Features

1/4 DIN Temperature Controller

DESCRIPTION

The MIC 2000 is a single loop, 1/4 DIN controller capable of controlling a variety of processes ranging from simple on/off to dual 4-20mA output with full PID. Inputs include thermocouple, RTD, millivolt, volt, and milliamp.

Standard features include: isolated process input, setpoint and output limits, and .56 inch high LEDs. It will display programming of process deviation and setpoint, of percent output, and scaling with decimal point positioning.

Optional features include: up to three relay outputs, three types of alarms, remote setpoint input, electric motor modulation, RS-485 communications and process value retransmission output as well as restricted security access. Access to configuration parameters and setpoint may be restricted by using the instrument's security-access mode.
